Pediatric Cardiology

Scientific Meeting of the Swiss Society of Pediatric Cardiology

Friday, November 20, 2026

In collaboration with:

Schweizerische Gesellschaft für Pädiatrische Kardiologie
Société Suisse de Cardiologie Pédiatrique
Società Svizzera di Cardiologia Pediatrica
Swiss Society of Pediatric Cardiology

Dear Colleagues

In addition to innovative therapeutic approaches, this year's programme will focus on the ever-growing impact of artificial intelligence on our diagnostic and therapeutic options, while also exploring what may become a reality in cardiovascular medicine in the future.

We hope that the meeting will offer inspiring presentations, stimulating discussions, and valuable opportunities to exchange ideas and experiences with colleagues and friends.

This year's meeting will take place shortly after the opening of the new Children's Hospital in Lucerne, and we are delighted to offer you a brief tour of the new hospital.

Kind regards

PD Dr. med. Martin Christmann KD Dr. med. Peter Kuen

Programme

Swiss Society of Pediatric Cardiology 2026

08.15	**Registration, Coffee, Gipfeli**
08.50	**Opening Remarks**
Session I	**Digitalisation in (Pediatric) Cardiology**
09.00	**AI in Cardiovascular Medicine: Current Applications and Future Directions** I. Shiri Lord
09.45	**Advanced Possibilities with 3D Mapping Systems for Ablation of Supraventricular Tachycardias in the Pediatric Population** M. Gass
10.10	**Break**
Session II	**Updates in Invasive Treatments**
10.30	**Bioresorbable ASD Devices** O. Kretschmar
10.55	**Double Switch and Beyond: Different surgical approaches in ccTGA** R. Gaudin
11.20	**Safe Transition Home: The role of Pediatric Home Care Nursing for Children with Complex Congenital Heart Disease** A. B. Schlüer
11.40	**From a sheltered heart to it's own rhythm: Transition to adult health care** A. Gasser
12.00	**Lunch**
13.00	**Assembly SSCP and VKHF Schweiz**
14.15	**Coffee Break**

Programme

Swiss Society of Pediatric Cardiology 2026

Session III	Cases and Projects
14.30	**Coronary–Cameral Fistula: Antenatal Perspective on a Congenital Heart Disease Case Report** N. Dakka
14.40	**Aortic Valve Replacement in Children: An Umbrella Review** R. Franchescini-Brunner
14.50	**Impact of acute maternal oxygenation on transposition of the great arteries antenatal physiology** N. Dakka
15.00	**Deviations from Normative Brain Growth Curves in Patients with Complex Congenital Heart Disease** M. Ehrler
15.10	**Multimodal Personalised Executive Function Intervention for School-Aged Children with Complex CHF (E-Fit Heart)** A. Schmid
15.20	**Fetal lamb model for LV hypoplasia** N. Odgaard
15.30	**Swiss ORCHID – Neurodevelopmental outcome in children after neonatal cardiac surgery** V. Rathke
15.40	**First Experience with the PULSTA Self-Expanding Transcatheter Pulmonary Valve in Children** t.b.d.
15.50	**Introduction of the Center for Child Health Analytics** S. Ruiz Ramos
16.15	**Networking**

Programme – Nursing Sessions

Swiss Society of Pediatric Cardiology 2026

13.15	**Get Together: Nursing Interest Group Congenital Heart Disease**
Nursing Session	
14.05	**From Failure to Thrive to Chylothorax: Nutritional Challenges in Pediatric Cardiology** J. Meyer
14.30	**Chylothorax and Nutritional Management: A case report** R. Sharabi-Christoph
14.50	**When jejunal feeding is not enough: A challenging pediatric case** N. Grieder
15.10	**Discussion**
15.30	**Neurodevelopmental and family-centered feeding intervention** I. Müller-Gorman
15.50	**Q & A Session**
